

Summary of issues related to ISTC Project #2048 **Improvement of Steels Corrosion Resistance**

C.H.M. Broeders

ISTC Project #2048 Issues on behalf of G. Mueller

- **ISTC Project #2048: “Improvement of corrosion resistance of constructional steels in liquid Pb and Pb-Bi alloys by means of their surface modification with the help of pulsed electron beams and protective coatings”, was prolonged with 3 years till 30.09.2008 with restricted funding:**
 - **EU funding 150 k€**
 - **FZK partnership funding 90 k€**
 - **SCK-CEN partnership funding 50 k€**
- **Project is progressing on schedule**
- **FZK collaborator and CEG member G. Mueller will give more detailed report at next CEG Meeting**
